

Jenny Mackay

**Classroom Behaviour Management
Consultant, Lecturer & Author**

Our Service

Our behaviour management programmes have been designed to give colleagues access to practical and effective skills with which to manage all forms of classroom behaviour.

Our seminar workshops focus on classroom management and the interpersonal skills with which to contain any interaction or behaviour issue.

We advise a 'whole school' approach and involvement of all school staff.

The skills learned are a synthesis of the best portions of the most useful and practical classroom techniques from Haim Ginott, Rudolf Dreikurs, William Glasser, Sternberg & Salovey and others.

Workshop topics focus on key areas of behaviour management and provide practical interactional and cognitive skills for use with any acting-out behaviour including rudeness, confrontation, avoidance and bullying.

There is also opportunity for colleagues to have their own needs and their own concerns addressed on an individual basis.

Seminar Workshop Aims

- To understand the dynamics of successful interactions.
- To provide practical interactive skills to

manage behaviour and oneself in 'the heat of the moment.'

- To clarify what is really meant by 'discipline', 'punishment' and 'responsibility'. To learn how to assess behaviour situations and how to choose the appropriate response to any behaviour.
- To learn how to apply those skills and be able to incorporate them into a successful process.
- To provide a range of successful strategies from case studies.
- To address and provide solutions for individual concerns.
- To reflect upon common practice and to review what works and what doesn't.

Professional Learning Programmes

Are focused on needs and arranged in consultation with senior management and staff and can be delivered to the whole school staff, staff groups or individual teachers.

Email us to discuss and plan a professional development program to meet your needs:
